## **Hemingway's Fly Fishing Products**

Hemingway's has been captivating the world for over more than a decade with a top quality, incredibly unique product lineup, "truly the finest from Europe." Known for our extremely realistic fly tying parts, it's a simple fact Hemingway's is one of the world's leading producers and distributors of high quality dubbing. An award winning selection of hand-made furred leaders and some of the most beautiful wood products available in today's marketplace such as custom landing nets, and hardwood fly boxes. Hemingway's is very proud that we are able to build and produce our products in house under the care and supervision of owner management and the dedication and hard work of our specially trained employees. This is what enables us to achieve and hold such a high standard of quality in each and every aspect of the entire product line. Hemingway's is the industry leader in hyper realistic flies, fly tying parts, and what we like to call, "Extreme Fishable Realism." Extreme Fishable Realism is an outstanding concept developed by the Hemingway's design team, but has also been an idea and ambition that has fascinated the industry ever since the first flies and fly tying products were brought to market. This great concept incorporates the marriage between natural components, such as fur and feather. Synthetic components such as Hemingway's ultra realistic parts -- to produce a superior overall look, durability, fishability, ease of use, and productiveness of the flies and fly tying products that you will find on these pages. By building these products, utilizing these great concepts, and integrating some absolutely amazing industry firsts such as, "natural-articulation," "true insect behavior," "real life-like movement and feel." What Hemingway's has achieved is not just an idea or design concept for the present, but a glimpse into the future of not only what's perceivable, but what's probable, now and for decades to come. "Created By Mother Nature, Made Possible By Hemingway's!"

# EVOLUTION STONE FLY TYING PARTS

## Evolution Series Stonefly Nymph

The Evolution Series Stonefly nymph is the next cog in the ever-changing wheel of the fly tying future. The Evo. Series boasts some of our most realistic, exciting, tier-friendly designs to ever be introduced into the world of fly tying. Hemingway's product designers took a natural Stonefly Nymph and said what makes this insect so amazing and how do we build a fly that will imitate it as closely as possible. This is how they came up with this simply perfect design. The awesome features that make this series so real is the one piece integrated head, legs, and antenna thorax. A low profile channel on all abdomen and thorax parts so every fly will have an extremely low flat profile, natural proportions, and realistic movement along with a newly designed abdomen and tails. The redesigned wing buds and abdomen backs along with several new exclusive natural colors simply make the Evolution Series. The only thing we didn't add were flames it just didn't need 'em. Tie a new Hemingway's Evolution Series Stonefly to the end of your leader and let the fish be the judge!

# REALISTIC TYING PARTS CADDIS WINGS

Hemingway's **Realistic Wings** are the beginning of a new era in dry fly wings, they are actually one of the best ideas since the introduction of genetic hackle. They are incredibly tier-friendly and made of the most premium quality wing material in the world and built to well exceed industry standards in every way measurable. As a matter of fact we have literally searched the world over and you just can't find a better balance of realism and durability. All of our wings are preformed, pre-cut, flexible, translucent, UV resistant, water proof, and extremely durable. These are not just another wing, "They are the wings of the future!"

## REALISTIC SET EPHEMERA DANICA WINGS AND BODY

These incredibly realistic set was built with one thing in mind. To match the most exciting hatches you may ever experience! The Green Drake, Slate Drake, and Hex. are just some of these amazing Mayflies. When these insects emerge from their burrows they attract the attention of every living thing within a hundred mile radius. Most of all fish and Fly Fisherman become enamored with these giant insects. This is a must have for anyone that is lucky enough to live near or travel to any waters where these hatches may occur. Each set is hand made and contains at least six pairs of fore wings and six pairs of hind wings and six hyper realistic extended mayfly abdomen and tails. Make sure you tie a strong knot and hold on tight because these duns are known to attract some true monster size fish!

- 6 realistic Ephemera Danica Tube Body
- 6 pairs realistic Ephemera Danica wings
- Preshaped and precut – ready to use – no cutting or shaping required.
- Premium quality - extra durable and flexible material
- High floatibility hyper realistic tube body
- Available sizes - Tube body: S, M, L
- Available sizes - Wings: M, L, XL

## BUDS AND BACK

### STONE FLY

*Fly Fishing Products*

**Hemingway's ultra realistic Wing buds & Abdomen Backs** are like a hi-def, 3D copy of the top of a Stonefly nymph. Made exclusively of a super realistic, self adhesive, extremely durable material that will have you convinced you're looking at parts from a real insect. They are designed to be an exact match of size, shape, color, profile, and proportions of a living Stonefly nymph. Used alone or coupled with Hemingway's other realistic parts they are as captivating and exciting to tie with as they are to fish. These products are not only designed to look like the real thing they also feel like the real thing especially when in the mouth of a fish. Use any of our parts floating or sub-surface you will find a winning combination that suites you, your style, method of fishing, and species your targeting!

## STONE FLY LEGS

**Hemingway's realistic Stonefly Legs** are almost an exact match to the natural insect it's extremely difficult to tell them apart. They are made utilizing a special process using a soft silicone based blend that looks, feels, and behaves like the real thing especially when moving through the water or picked up by a fish. You can be confident one of our foremost design goals is to produce products that fish bite and hold on to!

# REALISTIC TYING PARTS

## MAY FLY LEGS

Hemingway's realistic Mayfly Legs are made to match all Mayfly clinger species. From the smallest to the largest you can copy what is present on the waters you fish. Mayfly nymphs are a large part of a fishes diet and we have matched them perfectly, profile, proportions, size, and color. Coupled with our other Mayfly parts or just tied into your favorite pattern we've taken the guesswork out of it!

# REALISTIC TYING PARTS

## EPHEMERA DANICA

### NYMPH LEGS

*Fly Fishing Products*

**Hemingway's Realistic Ephemera Danica nymphs parts** are built using the same process as our other nymph parts but represent a very different species of Mayfly nymphs which are known as burrowing nymphs. The E.D. and other burrowing nymphs in the genus spend most of their time in their burrows well beneath the streambed. They will only become available to fish at certain times like during a pre-hatch, or hatching situation. When these nymphs make themselves available the fish will exclusively key in on these nymphs and feast. Which makes this pattern highly sought after and a must carry if you fish any waters where Green Drakes, Slate Drakes, Hex., Ect. may be living. Just like the duns hold on tight because you could be in the land of the giants before you even know it!

**Cream Yellow**

# SYNTHETIC TAPERED PEACOCK QUILL

**Hemingway's Synthetic Tapered Peacock Quills** are made from a very thin self-adhesive flexible vinyl based material. Available in 10 colors each strip is tapered from an incredibly fine 0.2mm. up to 2.2mm. and 100mm. in length which will basically tie the body of any pattern. From the smallest patterns in the #20's and even smaller, to your largest patterns. They utilize an amazingly detailed gradient print which gives each quill one dark edge and one light edge you can't even get that from a natural quill. These are a great match for almost any pattern from midges, buzzers, and nymphs to your favorite dry fly pattern these quills won't crack, break, or split leaving you with a failing fly at the worst possible time. No pre-treatment needed our quills will change your entire view on the hassle of using quill bodies! Also available on a clear foil backing which will enable you to partially see through these quills to the underbody giving your flies that amazingly sought after translucent

# GAMMARUS BACK

The **HMG Gammarus back** are precut for giving your fly a realistic and easy to tie look. Use a curved hook, add some weight, some dubbing and a rib and you are ready to tie a perfect gammarus or shrimp imitation in no time – a true killer for both freshwater and saltwater fly fishing. Gammarus nymphs are deadly for trout & grayling and indeed for coastal fishing for sea trout or sea run browns, so a gammarus pattern is a “must-have-in-the-box” pattern when fishing.

## TUBE BODIES

Hemingway's has designed the best most buoyant, durable, flexible, and flawless extended dry fly abdomens available. Our design has taken a time consuming, difficult, and daunting task and made it foolproof and user-friendly. Natural insects can be easily, quickly, and perfectly-realistically imitated to their exact proportions and true profile with just the snip of your scissors!

## MAY FLY TUBE BODIES

**Mayfly Tube Bodies** are made from a material which is ideal for easy and flawless fly tying, perfectly imitating the true shape and silhouette of the fly. Flies can be quickly and simply created and they are excellent floaters as the bodies are hollow and contain air bubbles. When tied, they act like a buoyancy aid keeping a fly on the surface. Bodies are flexible, soft and easy to tie. They come in a range of colors, applicable for all stages of the Mayfly hatch.

Available sizes: Small bodies – 10 pieces per packet, Medium bodies – 10 pieces per packet, Large bodies – 5 pieces per packet

# DUBBING

**Hemingway's**

*Fly Fishing Products*

## HARE'S DUBBING

**Hare's Dubbing** "Hare You Go." Doesn't get any better or more pure than our premium H.D. 100% pre-hand, and hand blended dub. Which basically means it's all done by hand and it's blended to pure perfection! One of the most popular and widely used dubbings on the market, and for good reason. It can be tied to represent almost anything that swims, crawls, floats, or flies. Our mixture is a special one consisting of only the best quality rabbit available in the world, and only the best most tedious blending method know to man. We also use a special mixture of guard hairs, long hairs, and underfur which renders only the best, easy to use, most superior product in the industry!

# CZECH NYMPH DUBBING

This is a speciality "Hand Made Blend," of natural fur and synthetic fibers especially designed for Czech, and Euro style nymphs but its uses go well beyond it's name. C.N.D. is a one of a kind product consisting of superfine trilobal and pearlescent fibers mixed with natural camel and rabbit hair. This is what we like to call a pro-blend, the reason it's called a pro-blend is simply because these types of complex hand blended dubs. were only available to professional fisherman that had access to speciality blends or were willing to mix it themselves. Hemingway's saw the great benefits and extreme fish catching ability of this wonderful product and decided to unlock this secret and offer it to fisherman all over the world!

				
<b>Cinnamon</b> HMG-D-CN-20	<b>Light yellow</b> HMG-D-CN-02	<b>Purple</b> HMG-D-CN-19	<b>Chartreuse</b> HMG-D-CN-04	<b>Cream</b> HMG-D-CN-05

Hemingway's P.D. is one of the most effective Peacock blends offered in the world of fly tying today. It is a great substitute for natural herl and highly sought after by the most selective tiers looking for that extra edge. What gives this dubbing such a high standard of quality is the fact it's medium/soft blend and perfect color mixtures give it a superior "3D translucent ultra buggy effect." Peacock Dubbing is in huge demand because of its durability, versatility, and that it can help you tackle any fly tying challenge from the classics, to the most modern twenty-first century patterns.

We guarantee this will be one of your new goto's!

**Ice Dubbing** is some of the most effective highly sought after dubbing on today's market. Whatever your trying to imitate, It will give you that natural effect. A hatching insect, or the shine of the scales on a baitfish. This dubbing will offer your flies that extra edge. The uses of this product are truly endless. Built of a special blend, this mylar based material was specially designed with a fine fiber base for extreme ease of use, and an overall realism. This one will definitely find its way to the top of your tying kit!

# UV ICE DUBBING

**UV Ice Dubbing** offers all the same great features as our ice dubbing like, ease of use, fishability, and catch-ability, but kicks things up a notch to a whole new level. We also add our amazing UV fibers to the mix. This new age dubbing is a must have For anyone that ties twenty-first century patterns. It's also right at home putting a new look, feel, and spin on any of the classics. Hemingway's UV Ice is a must have, and a definite home run!

# ALL ROUND DUBBING

**All Round Dubbing** is one of our most popular dubbings and really lives up to its name. A.R.D. is a synthetic nylon which makes it extremely light weight, water resistant, and very easy to use for any application especially "dry," or floating flies. It also has a close resemblance to natural fur and tends to lend itself well to almost any pattern you can imagine. A.R.D is so versatile you can be sure you will find the right color or shade to match that special go to pattern in your fly box!

# STARLITE DUBBING

**Starlite Dubbing** is a blend of very fine Mylar type material and fine polyamide fiber. It can be formed into hanks and used for big streamers or cut for dubbing small flies. Works very well with most other materials for dubbing and it doesn't absorb water, so large flies don't get heavier

# BEAVER PLUS DUBBING

**Beaver Dubbing Plus** is recognized by all tiers as one of the finest natural furs for tying dry or floating flies. Our special blend of the finest Beaver underfur and just the smallest hint of superfine Trilobal fibers has been sought after by the most selective tiers from all over the world to make their dry fly patterns extremely buoyant, water resistant, and to add that special unique touch to their most delicate patterns!

# FROSTY DUBBING

**Frosty Dubbing** is an extremely awesome blend of very soft, very long, very translucent, totally synthetic fibers. This dubbing was especially designed to have just the right amount of natural sparkle and reflectiveness without being overly flashy or having too much bling. The tier will find this dubbing very easy to work with, blend, and even use in ways that would be considered unconventional for most other dubbing. F.D. is highly effective for just about any and every application. Its uses range from tiny nymphs, and streamers to the largest of Pike, Musky, and Salt Water patterns. This is a must have for anyone that enjoys flexibility in their materials!

Fly Fishing Products

# UV DUBBING

**UV Dubbing** is quickly becoming one of the most popular concepts in the modern world of fly tying/fishing and for good reason. Our UV offers a fine synthetic blend of sparkle and superfine diameter UV fibers that is different and boasts a higher quality, non-plastic feel, and far superior ease of use in comparison to any other UV dubbing on the market. Our UV will attract fish in any light day or night. Water color, clarity and depth are no problem. It has been tested under the best and worst of conditions and cuts through the toughest challenges to keep you hooked up! (Check out the other dubbings and products featuring Hemingway's UV)

# DEER HAIR DUBBING

**Deer Hair Dubbing** is extremely unique, highly sought after, and simply one of the hottest dubbings in the modern world of fly tying today. It's a secret mixture of cut, curled, and dyed winter deer hair mixed to hi-floating perfection. This blend is so versatile it can be use to tie everything from heads, legs, and antenna on dry flies, to gills, legs, and bodies, on nymphs, emergers, even midges, and just about anything else you let your imagination run with! "It's all that and a bag of cased caddis larva!!!"

# STREAMER FIBERS

**Hemingway's Streamer Fibers** are specially designed synthetic fibers that are made to precisely mimic the body of any baitfish. These fibers are specifically developed to keep your patterns water resistant and light-weight. We know it's important to reserve your energy for fighting those monster fish, not wasting it on casting those big heavy water logged Flies. The versatility of this material is also one of its greatest qualities you can tie anything from the tiniest trout and panfish flies to the biggest Salmon, Steelhead, and Saltwater patterns! (All of our Streamer Fibers can be colored with permanent markers, or sprayed to achieve any custom pattern or design)

<b>Brown</b> HMG-SF-06	<b>Dark Brown</b> HMG-SF-07	<b>Red Wine</b> HMG-SF-08	<b>Orange</b> HMG-SF-09	<b>Chartreuse</b> HMG-SF-10	<b>Dark Olive</b> HMG-SF-11	<b>Olive</b> HMG-SF-12	<b>Light Olive</b> HMG-SF-13	<b>Blue Ocean</b> HMG-SF-14

# STREAMER FIBERS - FLASH BLEND

**Flash Blend Streamer Fiber** is the perfect blend of Hemingway's Streamer Fiber and a unique flashy angel hair fiber that gives our Flash Blend all of the natural shine of bait fish scales. This awesome blend has all the water shedding capabilities of our original Streamer Fibre and is just as user-friendly. No matter what technique you chose to use it is very easy to achieve that widely sought after tapered look. Short and plump or long and skinny this material is very well suited for tying any and all types of streamers fresh or salt!

<b>White</b> HMG-SFFB-01	<b>Tan</b> HMG-SFFB-02	<b>Light Brown</b> HMG-SFFB-03	<b>Natural</b> HMG-SFFB-04	<b>Red</b> HMG-SFFB-05	<b>Orange</b> HMG-SFFB-06

# HEMINGWAY'S FLY SELECTION

## Hemingway's Fly Selection

Our flies are tied by a select handpicked group of professional fly tiers. This elite group is exclusively selected for their outstanding skill set and fly tying ability. All Hemingway's flies are tied on Japanese high carbon forged, black nickel, steel hooks. Built to our strict set of standards using only Hemingway's premium fly tying materials makes them extremely well oiled fish catching machines. This standard introduces a whole new level of quality to assembled flies. These flies are sought after by some of the worlds top dealers, guides, and fisherman and are made in limited production, "so get them while you can!"

## TENKARA ROD

Hemingway's Tenkara Rod Petz, with its 6:4 action provides a precise cast while having enough backbone for challenging conditions and fish. It comes with an extra tip. It is encapsulated in clear plastic storage tube so it's easy to see and grab the right rod when you are in a hurry. Hemingway's Tenkara Rod Petz has beautiful deep emerald color and features comfortable cork grip with a cork burl butt-end accent, drainage hole in the end cap and a threaded metal rear plug insert.

Rod is designed to use without the reel. Last section has strong Lillian braid string connected to the tip.

**Tenkara Rod Petz**  
HMG-TR-Pz

# TENKARA GEAR

## TENKARA LINE

Tenkara Fly Fishing line is created for traditional Japanese Tenkara fishing technique. **Level line** is very visible line so you can easily track casts and detect strikes better. This Hi Visibility Twisted Tenkara Level line comes in orange color and length 10ft/3.0m.
